Subject: Maritime Decarbonisation IWG

Dear Colleagues

Good morning.

As you are fully aware last year we established the new IWG on Decarbonisation under the chairmanship of Haris Zografakis. This IWG has been working extremely hard and has produced some excellent work as they explained during both the IWG open session in Gothenburg and during the panel session at the Colloquium in Gothenburg. They have also prepared an excellent paper and I urge you all to consider this.

Please find attached hereto a request from this IWG. You will be very pleased to see that there are only 3 questions which the NMLAs are being requested to answer.

I would urge you to answer these questions as soon as possible and by the 31st December 2024. Answering them does not entail much time as you can see.

Best regards

Ann
